

How to install and use Hindi **ILIT**?

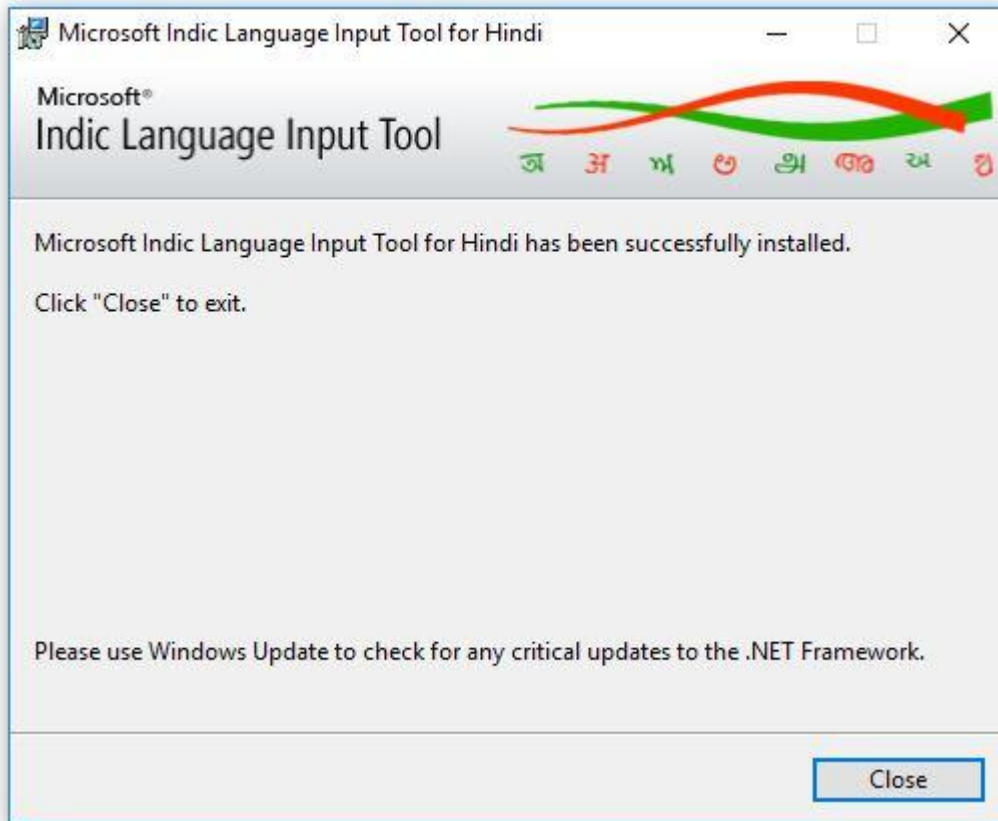

Step 1: Run **ILIT** 'Hindi.exe' file and click on next and wait till you get the 'Install' option.

Step 2: Click on 'Install' and wait till you get the 'Close' option after successful installation.

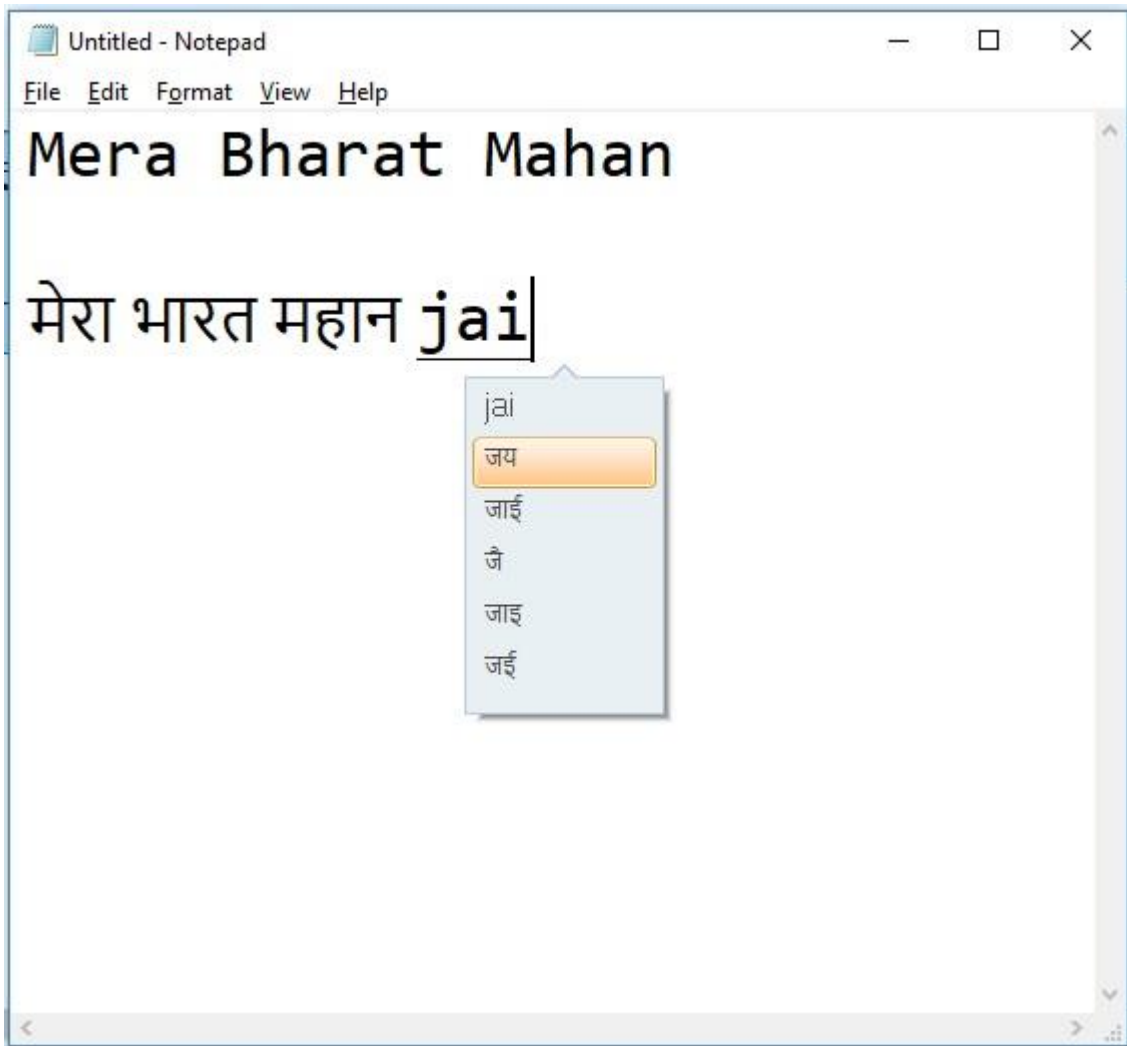

Step 3: Click on ‘Close’.

Step 4: Now open the window where to type Hindi, say in notepad. Open the notepad. Now click on 'ENG' option in the taskbar and choose 'Hindi'.

Step 5: Now simply type Hindi as we type it using English alphabets. A window will appear that will help you to choose right combination of alphabets to type your Hindi word correctly.

That's all...
